

Guidelines for Installation:

- 1) Insert the Product CD into CD Drive of the computer where the software product is to be installed.
- 2) The Setup program of the software product will automatically start the installation process. This setup will follow the sequence mentioned below.
- 3) It will first display the "License Agreement screen" (Fig. 1). Please read the License agreement and then click in the checkbox "I accept the terms in the License Agreement"(Fig. 2). This action will turn on the "Install" Button. Now, click on the "Install" button.

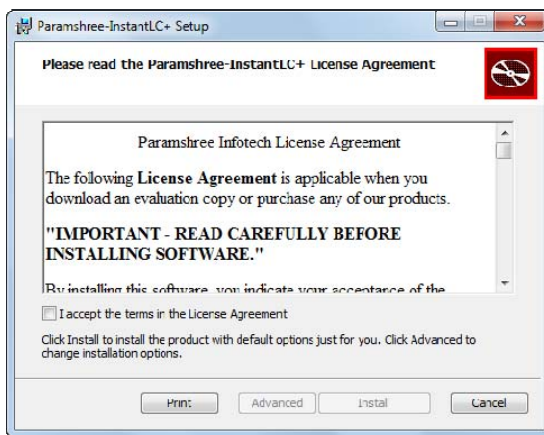

Fig. 1

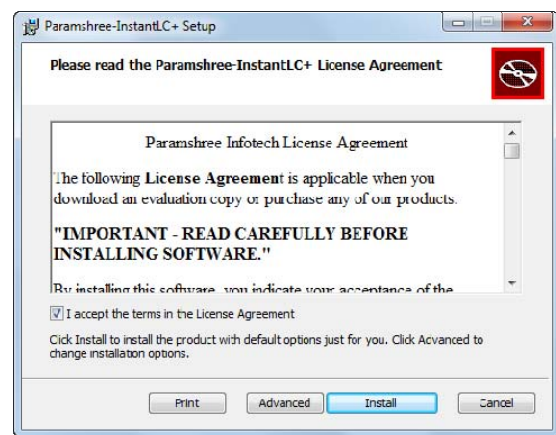

Fig.2

- 4) Setup will begin actual installation of the product and display a progress Indicator while it copies the software files to your computer (Fig. 3).

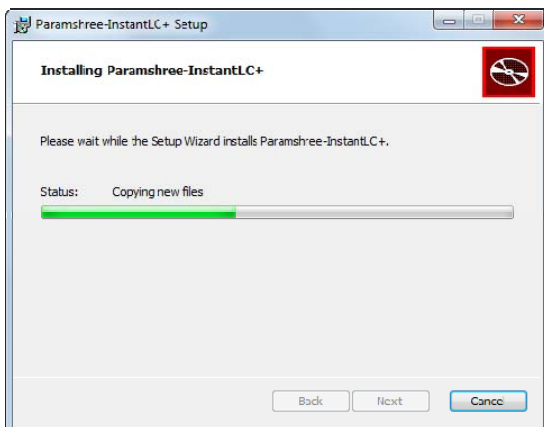

Fig. 3

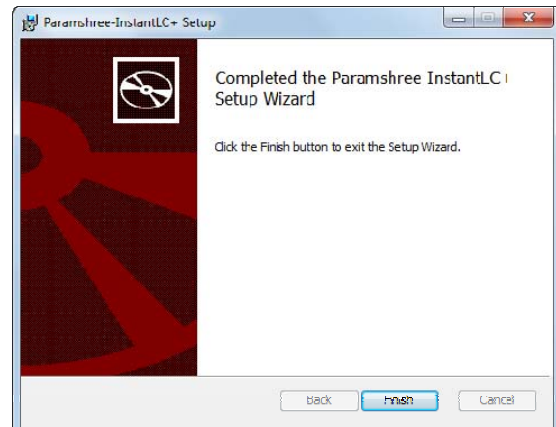

Fig. 4

- 5) When the installation by the setup is over, you will see a success screen (Fig. 4). Please click on "Finish" button to close the screen.
- 6) An icon for the software product is created on your desktop during the installation.
- 7) At this stage, the product is installed but it has to be registered and activated before you can start using the same.
- 8) For registering and activating the product, you have to obtain an Activation Code from the Company. Please, follow the Guidelines for Registration, given below to obtain the Activation Code and activate the product.

Guidelines for Registration:

- 1) You can now start by Clicking on the product's icon on your desktop.
- 2) A "Register Your Software" window is displayed (Fig. 5). Enter the Username, Name of your Organisation and the Serial No. (which is pasted on the CD jacket) in the respective boxes provided in this window. Click on the NEXT Button. Now, the Machine Code for your computer is generated and displayed in the new window "Activate Your Software" (Fig. 6).

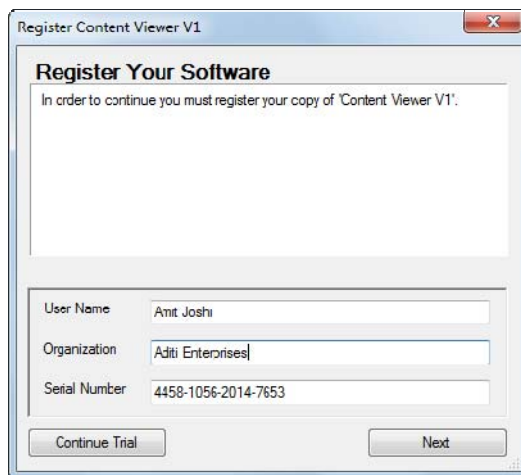

Fig. 5

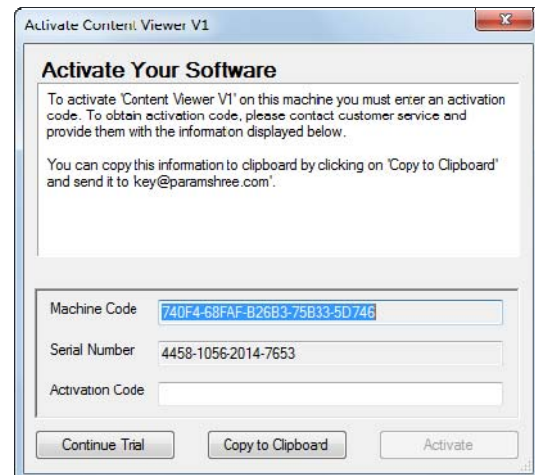

Fig. 6

- 3) At this stage, you have the Srl.No., Machine Code but not the Activation Code. Click on the "Copy to clipboard" Button. The details are now stored into memory.
- 4) Compose/ Write an e-mail addressed to key@paramshree.com and paste the details from memory (i.e. Username, Organisation, Srl. No., Machine Code) in the text part of the e-mail. Then, send the e-mail. Thereafter, based on these details sent by you, the company will generate an Activation Code and send the same to you through return e-mail within 2 working days.
- 5) On receipt of Activation Code, repeat the Registration Process Steps 2 and 3 as done earlier. When you are in the "Activate Your Software" (Fig. 6) window, complete the process by entering the Activation Code and then clicking on "Activate" Button. Now the software product is activated and its opening screen is displayed. You can now start using the product.

Troubleshooting:

During installation, following three possible problems may arise if the required system software is not installed on your computer. In such cases, follow the corresponding instructions given below. Thereafter, repeat the steps for installation.

- 1) If the **setup does not start automatically**, please follow these steps:
 - a. Click on "My Computer" icon on your Desktop screen.
 - b. Right-click on the Drive which contains the product CD and select "Explore" from the list of options.
 - c. The contents of this drive will be displayed to you.
 - d. Double-click on "**Setup.msi**" file to start the setup for product installation. Then follow the aforesaid guidelines for installation and registration.

2) If **you do not have the “.NET” (i.e. Dot-Net) Framework installed on your computer**, you will see a message prompting you to Install “.NET” (i.e. Dot-Net) Framework. In that case, please follow these steps:

- a. Click on "My Computer" icon on your Desktop screen.
- b. Right-click on the drive which contains the product CD and select "Explore" option.
- c. The contents of this drive will then be displayed on the screen.
- d. Double click on the "dotnetfx" folder. The contents of "dotnetfx" folder will now be displayed on the screen.
- e. Double click on the "**dotnetfx.exe**" file to install the Dot-Net Framework on your Computer. After the installation of “.NET” framework is complete, follow the aforesaid guidelines for installation and registration.

3) If **you see a message prompting you to Install the Windows Installer** on your Computer, please follow these steps:

- a. Click on "My Computer" icon on your Desktop screen.
- b. Right-click on the drive which contains your product CD and select "Explore" option.
- c. The contents of this drive will be displayed to you.
- d. Double click on the "dotnetfx" folder.
- e. Double click on the "**instmsia.exe**" file to install the Windows Installer on your Computer. After the installation of Windows Installer is complete, follow the aforesaid guidelines for installation and registration.
