

Guidelines for Product Download:

- 1) Before beginning the product download, it is advisable to know the default location/ folder where a file gets downloaded. It would be helpful if your browser settings allow you to download a file to your desired location/ folder instead of a default location/ folder.
- 2) While in the 'Product Download' page (Fig. 1) of Paramshree's website (http://paramshree.com/product_download.php), click on the 'Download' Button. This action will display a window (Fig. 2) seeking your response for downloading the zipped setup file.

Fig. 1

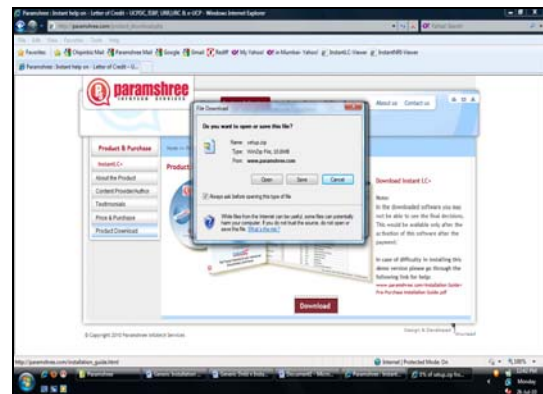

Fig. 2

- 3) The window (Fig. 2) contains three Buttons viz. 'Open', 'Save' and 'Cancel'. Click on the 'Save' Button to save the setup file on your Hard Disk Drive (HDD). If your browser allows you an option to change the destination folder for download, choose the desired destination folder on your HDD and save the zipped setup file there. However, even if your browser does not allow you such option, there is no need to worry, the file will be downloaded into your set default folder. This will complete downloading of Setup File of the software.

Guidelines for Installation:

- 1) Open the Windows Explorer (not internet explorer) and go to the folder where the setup.zip file is downloaded.
- 2) Open the setup.zip file and extract the setup.msi file from it.
- 3) Double click on the setup.msi file to begin the installation.
- 4) The Setup program of the software product will automatically start the installation process. This setup will follow the sequence mentioned below.

- 5) It will first display the 'License Agreement screen' (Fig. 3). Please read the License agreement. For accepting the Licence Agreement, click in the checkbox " I accept the terms in the License Agreement". This action will turn on the 'Install' Button. Now, click on the 'Install' button to continue installation.
